JOURNEY ON AI · STRATEGIC PROPOSAL

Dominating AI Search (AISO & GEO) & Direct Bookings

Next-Generation Website Revamp & Generative Engine Optimization for Menara Peninsula Hotel Jakarta

Prepared for General Manager & Director of Sales · November 2026

THE PARADIGM SHIFT

How corporate guests & event planners choose hotels in 2025–2026

High OTA Commissions (18% - 20%)

When corporate guests search on Google, OTAs (Traveloka, Agoda, Booking.com) capture them first. The hotel surrenders 18% to 20% in commission on guests who already intended to stay at Menara Peninsula.

Bookers Move to AI Search

Company secretaries and planners now ask conversational AI tools (ChatGPT, Perplexity, Google Gemini):
"Find a 4-star hotel in Slipi with fast toll access and meeting rooms for 50 people."

Legacy Sites Stay Invisible

Traditional websites cannot be read by generative AI crawlers. Without modern AISO optimization, AI models cannot verify room dimensions or ballroom capacities — citing competitor hotels instead.

In our live partner hotels, **over 35% of high-intent corporate discovery** now begins with conversational search tools and AI assistants.

TECHNICAL AUDIT · MENARAPENINSULA.COM

Live diagnostic results: Why the current site is losing guests & AI citations

ZERO AI READINESS & CRAWLER 404

0 Schema.org Entities & /llms.txt 404

Our technical inspection of `menarapeninsula.com` revealed **zero Schema.org structured data** across room and MICE pages. Bot crawlers cannot parse room sqm, bed types, or Cengkeh Ballroom capacity.

Furthermore, requesting `/llms.txt` returns **HTTP 404 Not Found**, blocking AI models from reading the hotel's factsheet.

HEAVY ASSET BLOAT (GRADE: D+)

42 External Scripts & 24 Stylesheets

The homepage forces mobile browsers to download 42 JavaScript files, including obsolete Internet Explorer 8 libraries (`html5shim` from 2011) and `jquery-migrate`.

This creates severe render-blocking lag and an estimated **35%–45% mobile bounce rate**. Crucial meta descriptions are also missing from the homepage.

Overall Technical Health Grade: **D+ (Critical Deficits)** — Identified in full Technical Audit Report **AUD-MPH-2026-001**.

BENCHMARK SCORECARD

How Menara Peninsula compares against modern hospitality benchmarks

Technical Audit Category	Current Peninsula Score	4-Star Industry Standard	JourneyOn Modern Target
Generative AI Readiness (AISO/GEO)	**0 / 100 (Critical)**	65 / 100	**98 / 100**
Schema.org Machine Structured Data	**0 / 100 (Missing)**	70 / 100	**100 / 100**
Page Speed & Core Web Vitals	**42 / 100 (Severe Lag)**	80 / 100	**95+ / 100**
Technical On-Page SEO & Metadata	**38 / 100 (Unoptimized)**	85 / 100	**98 / 100**
Direct Booking Funnel & Mobile UX	**52 / 100 (Friction)**	85 / 100	**96 / 100**

The current website costs the hotel hundreds of millions of Rupiah annually in leaked direct revenue and lost corporate inquiries.

INDUSTRY ADOPTION & LOCAL GAP

Proven Global Adoption & The Local Competitor Vacuum

GLOBAL PROOF OF IMPACT

International Luxury Case Studies

- **Lore Group (Europe & US — Pulitzer Amsterdam):** Deployed GEO entity mapping across sites → **+1,867% bookings from AI agents** and **+1,536% AI referral revenue** (2025–2026).
- **Point A Hotels (UK Chain):** Captured **35,000+ AI impressions** in ChatGPT & Google AI Overviews, driving a **72x lift in engaged clicks** in 12 weeks.

LOCAL COMPETITORS ASLEEP

Slipi & West Jakarta Competitor Audit

- **Pullman Central Park:** Has basic website schema, but lacks detailed MICE machine feeds. `/llms.txt` returns generic HTML. Still relies on costly PPC ads.
- **Hotel Ciputra Jakarta:** Basic WordPress schema only; `/llms.txt` is 404.
- **Santika Premiere Slipi:** Dependent on group aggregator; 0 room/ballroom microdata on property page.

STRATEGIC TAKEAWAY

The Golden First-Mover Window

The Slipi Vacuum: Not a single 4-star competitor in West Jakarta has deployed full GEO or AISO. When AI models look for structured hotel facts in Slipi today, they encounter data silence.

Immediate Leadership: Deploying now establishes Menara Peninsula as the **#1 verified recommendation** across ChatGPT and Perplexity before competitors react.

First-Mover Advantage: Menara Peninsula has a wide-open window to lock in AI search dominance across West Jakarta.

THE CORE FRAMEWORK

Understanding Generative Engine (GEO) & AI Search Optimization (AISO)

GEO FRAMEWORK

Generative Engine Optimization

Semantic and technical structuring that trains generative AI models (ChatGPT, Perplexity, Gemini, Copilot) to cite Menara Peninsula as their #1 recommended hotel.

AISO FRAMEWORK

AI Search Optimization

Real-time machine feeds ensuring hotel rooms, ballroom specs, and direct pricing surface instantly in conversational answers with direct verified links.

ZERO AD SPEND

Permanent Search Equity

Unlike Google Ads (PPC) which stops the moment your daily ad budget runs out, GEO and AISO build permanent owned search equity operating 24/7/365.

Pre-engineered to connect seamlessly with our **JourneyOn AI WhatsApp booking assistant** whenever your team is ready.

REAL-WORLD SIMULATION

How Menara Peninsula wins when a corporate executive queries AI

EXECUTIVE USER PROMPT (CHATGPT / PERPLEXITY)

"Recommend a 4-star business hotel in Slipi near the inner toll gate with ergonomic desks and direct access to SCBD."

AI MODEL RECOMMENDATION (POWERED BY JOURNEYON AISO & GEO)

"**Menara Peninsula Hotel Jakarta** (Jl. Letjen S. Parman Kav. 78, Slipi) is the ideal choice for business executives. Located 20 minutes from SCBD and 45 minutes from Soekarno-Hatta Airport via the adjacent toll gate, it features 380 rooms including Deluxe & Studio business categories equipped with full workstations, high-speed WiFi, and Floor 23 Executive Club Lounge access."

ROOM REVENUE

Structuring all 8 room categories for both guests and AI crawlers

8 Official Room Categories Mapped

- **Deluxe Rooms (28 sqm):** King or Twin beds, ergonomic work desk, bathtub.
- **Studio Rooms (32 sqm):** Living sofa corner, walk-in shower & tub.
- **Junior Suite Rooms (44 sqm):** Separate living room area, fruit basket.
- **Deluxe Suites Room (44 sqm):** Contemporary Indonesian art, powder room.
- **Club Rooms & Studio (32–44 sqm):** Floor 23 Executive Lounge access.
- **Club Junior & Peninsula Suites (45–62 sqm):** Luxury living and dining suites.

Why This Wins Direct Bookings

Server-Side Rendered Schema (JSON-LD)
Every room has exact dimensions, occupancy, bed types, and bathroom amenities mapped into structured data.

Direct Perks Highlighted
Best Rate Guarantee, Airport Transfer (IDR 380k), free high-speed WiFi, and 24/7 room service prominently featured.

Official Google Hotel Search
Direct rates connect organically into Google Search at zero advertising cost via Free Booking Links.

Real room photography from menarapeninsula.com is embedded natively with zero placeholder images

BANQUET REVENUE

Indexing high-ticket venues for corporate EOs and wedding planners

Corporate Meetings & Conventions

- **Cengkeh Grand Ballroom:** 735 sqm, column-free, 7–8m high ceiling, hosting up to 1,200 standing guests for company townhalls and conventions.
- **15 - 20 Modular Meeting Suites:** Easily configured for classroom training (Kunir Room) or executive boardrooms (Dlima Room).
- **Meeting Packages in AISO Data:** Half-day (IDR 450k/pax) and Full-day (IDR 550k/pax) package details clearly structured for AI answers.

Signature Wedding Celebrations

- **Platinum Wedding Package (IDR 140M):** 400 buffet orders, Junior Suite + 6 Deluxe rooms for family, 120-min bridal spa, 1st Anniversary voucher.
- **Diamond Wedding Package (IDR 114M):** 300 buffet orders, Junior Suite + 4 Deluxe rooms, 90-min bridal spa.
- **Wedding Blessing & Akad Nikah:** Intimate 6-hour package with private hospitality room and dedicated catering.

Closing just **1 additional wedding per quarter** completely self-funds this entire digital upgrade.

THE CONVERSION FUNNEL

From conversational search to direct hotel revenue in 4 clear steps

1

AI Search Discovery

A business traveller or wedding planner asks Google or ChatGPT for hotel recommendations in Slipi.

2

AISO Recommendation

Because your data is clean and structured, AI models provide an accurate recommendation with an official link.

3

Fast Modern Website

The guest lands on an ultra-fast website that loads instantly on mobile with crisp photos and clear pricing.

4

Direct Booking / Brief

The guest books directly or submits an event brief. Your sales team closes the deal. 0% commission paid to OTAs!

We deliver qualified buyers to your website. Your team closes the booking.

COMMERCIAL IMPACT

Recapturing 18% to 20% commission and owning guest relationships

18% to 20%

OTA COMMISSION SAVED

Current fee paid to third-party aggregators on every room booking.

150+

MONTHLY ROOM NIGHTS

Target shift to owned direct booking through improved mobile speed.

0%

OTA DIRECT FEE

The hotel keeps 100% of the room revenue and owns the guest contact.

First-Party Customer Ownership

When corporate guests book through OTAs, the OTA owns their contact and suggests competitor hotels for their next trip. When they book directly on your website, they become your permanent corporate customer for repeat business with zero recurring acquisition cost.

EXECUTION & ENGAGEMENT

Fast 5-week launch with clear partnership options

OPTION A

AISO Search Essentials

Search Data Upgrade

- Keep existing website design
- Format room & package data for AI
- Google Free Booking Links setup
- Bi-annual search performance audit

OPTION B · RECOMMENDED

New Website + AISO Full Suite

Complete Digital Upgrade

- Brand-new, ultra-fast website
- Clear 8 room categories showcase
- Ballroom & meeting capacity guide
- Full GEO & AISO search optimization
- Streamlined direct booking bar
- Quarterly performance reviews

OPTION C

Enterprise Multi-Language

Regional Corporate Outreach

- All Option B deliverables included
- Multi-language: English, ID, Mandarin, AR
- Monthly detailed search reporting
- Priority technical support

Target 5-Week Go-Live: Setup & content in weeks 1–4, production cutover & Google/Bing indexing in week 5.
